Master-Detail Linking

Overview

- Master-Detail Linking allows you to click on a “Master” View to dynamically update one or more “Detail” Views within the same Analysis or Dashboard Page

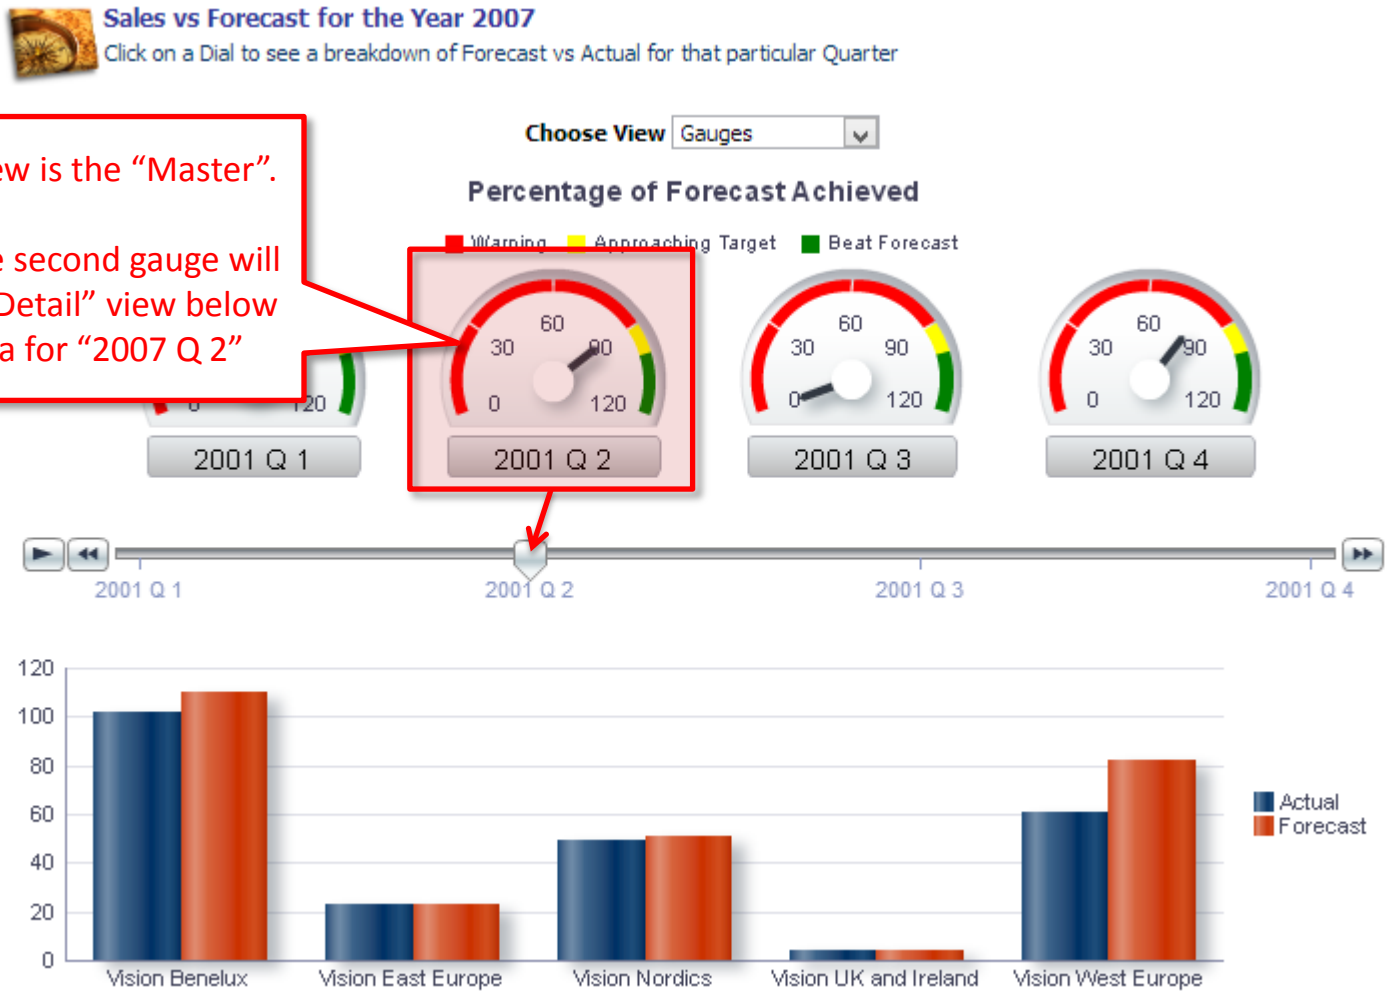
Master-Detail Linking

Master View



The Gauge View is the "Master".

Clicking on the second gauge will animate the "Detail" view below to show data for "2007 Q 2"

Master-Detail Linking

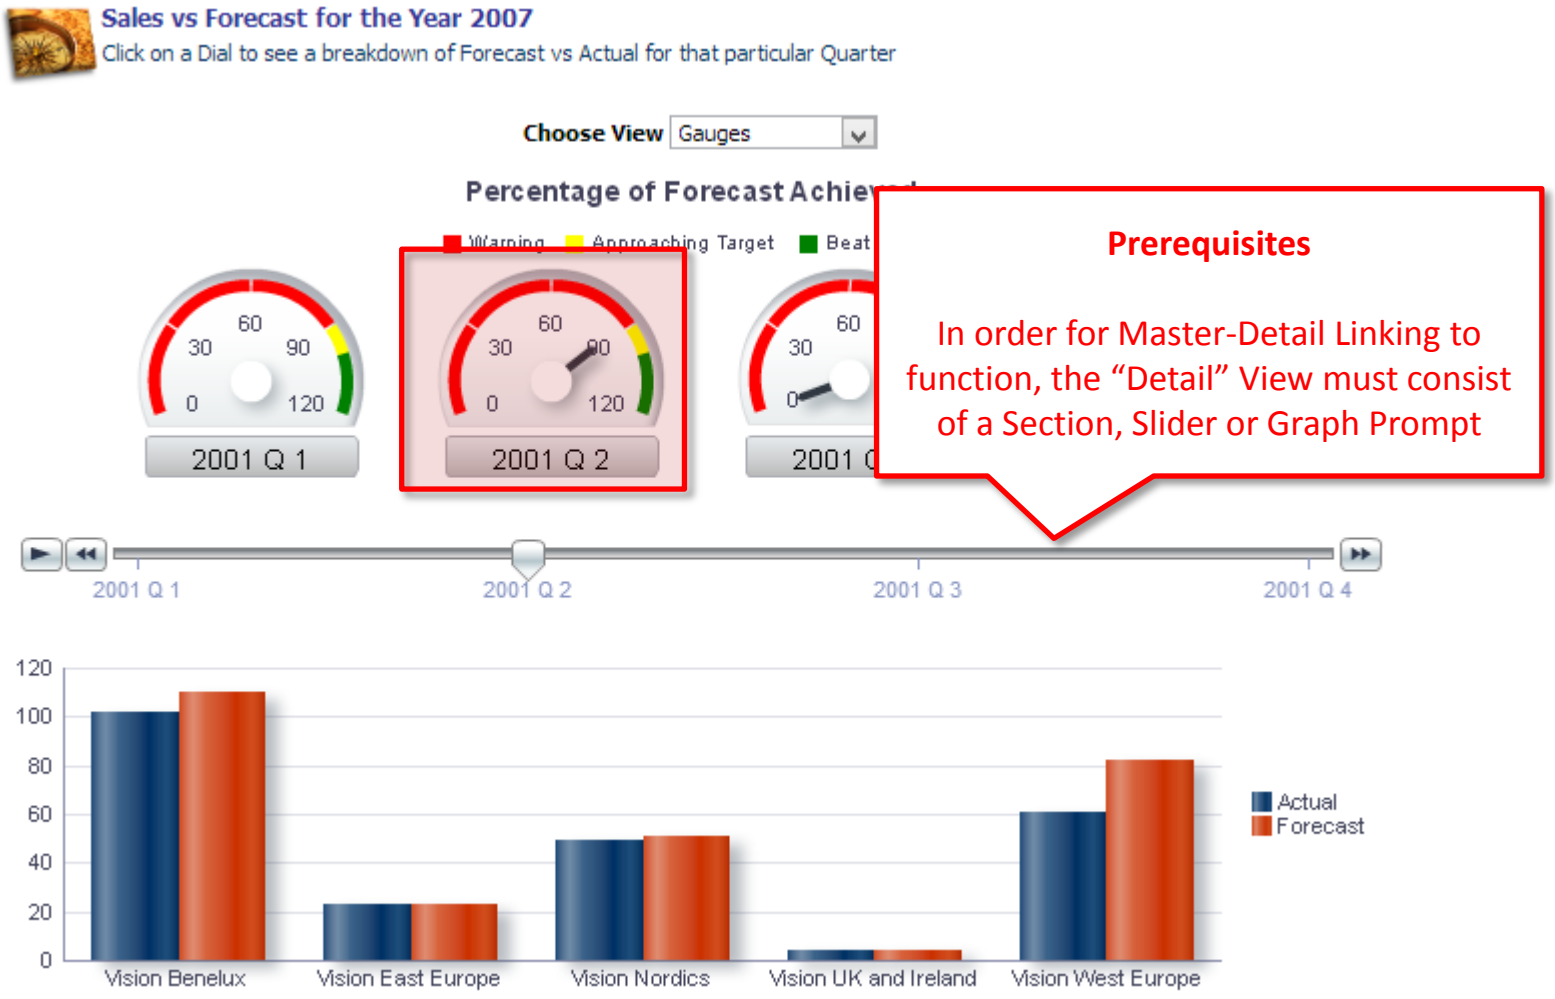
Prerequisites



Prerequisites

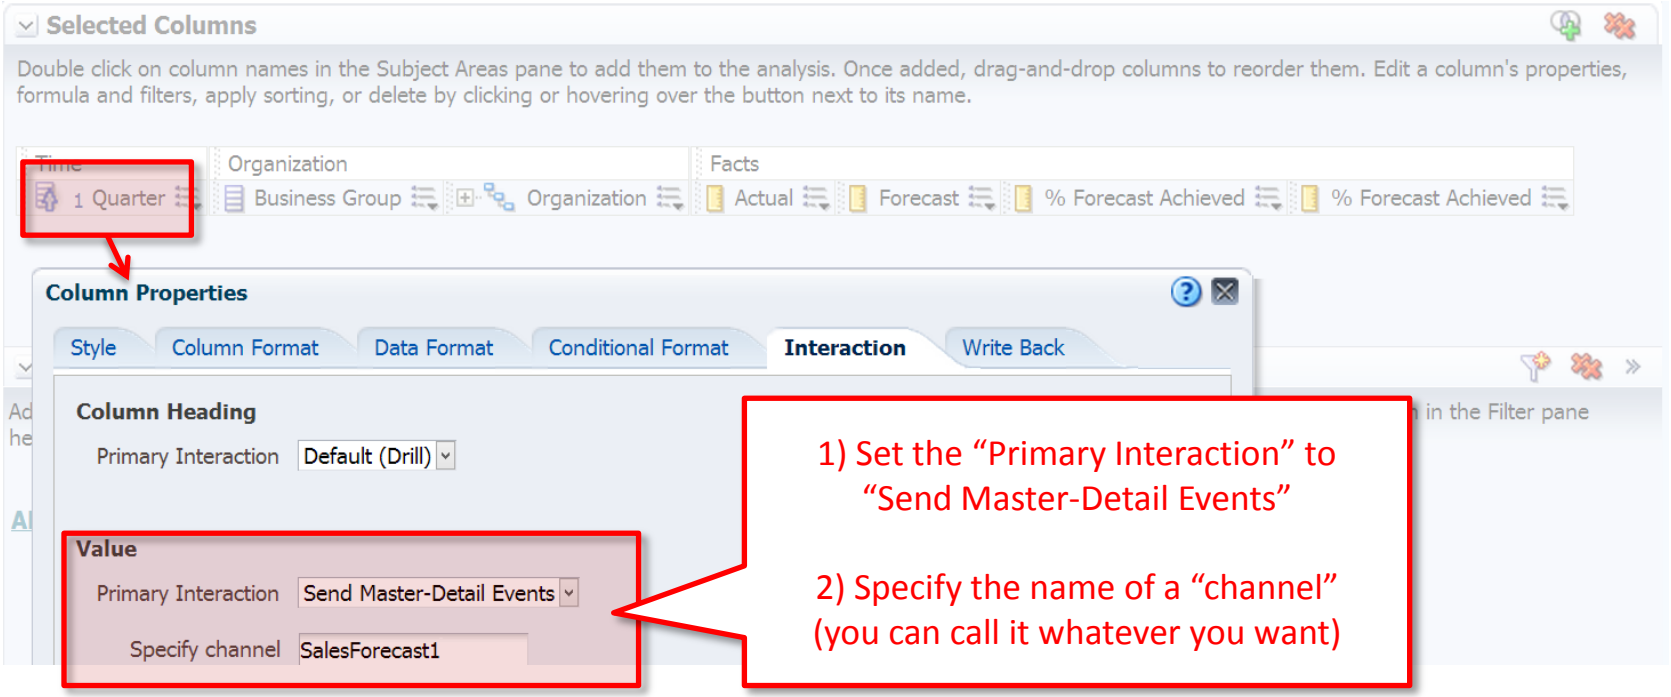
In order for Master-Detail Linking to function, the "Detail" View must consist of a Section, Slider or Graph Prompt

© Peak Indicators Limited

Master-Detail Linking

Defining – Step 1

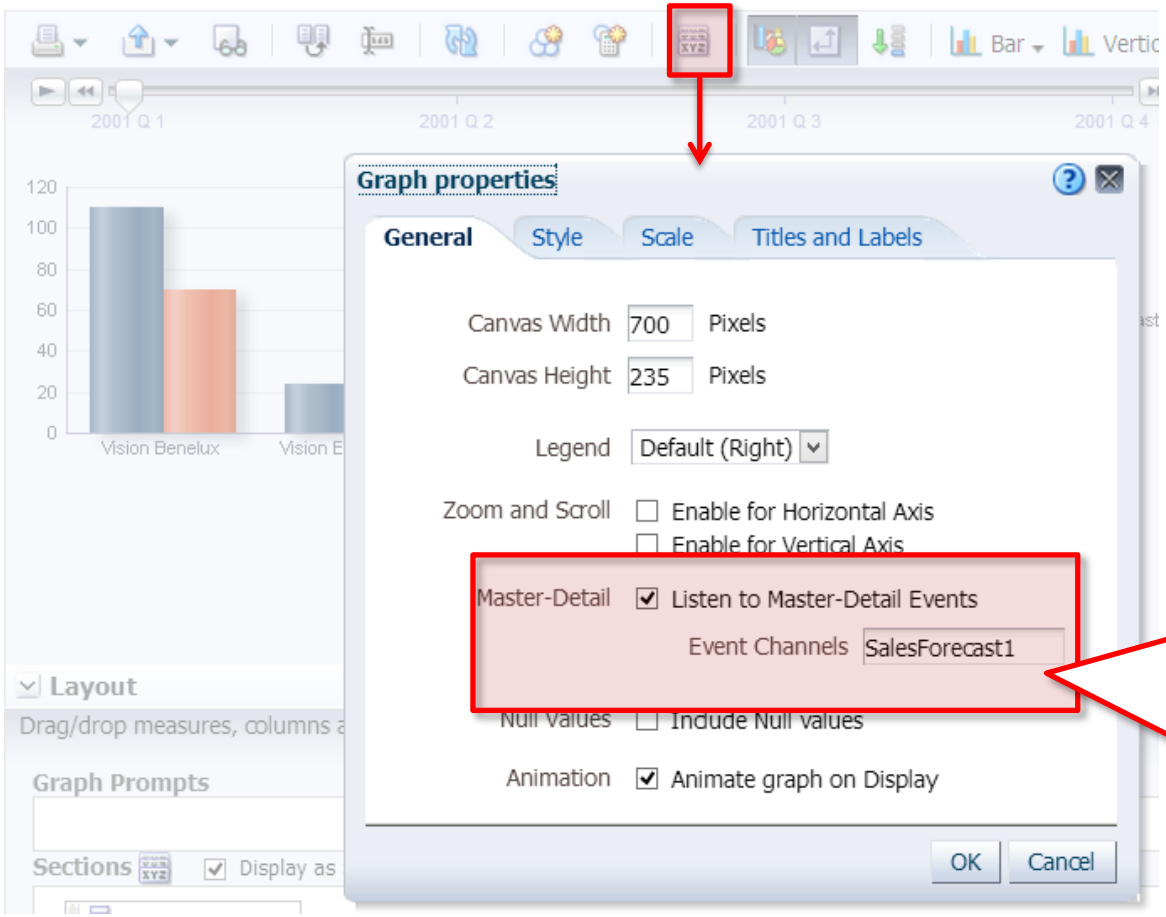
- Defining Master-Detail Links are easy. Step one is to open up the Column Properties for the relevant Column and set its "Interaction" properties as shown below



Master-Detail Linking

Defining – Step 2

- Then open up the “Graph Properties” of the “Detail” View and configure the View to *listen* on the same “Event Channel”



This is the same Event Channel specified on the previous slide.

You have to type it in manually, there is no drop-down list unfortunately

Master-Detail Linking

Defining - Done

That's it!

Your Master-Detail Linking is now configured……
